Real-time Bluetooth Sync

Digital Twin Animation: Real-time visual feedback reduces anxiety and gamifies the exhale process.

Clinical Data Cards: High-contrast typography and clear hierarchy for caretakers to monitor vital metrics at a glance.

Digital Companion

Translating Breath into Accessible Health Metrics

The iOS companion app acts as a dual-purpose dashboard. Real-time animations mirror the child's physical effort to provide instant gratification, while complex respiratory data is translated into clear, actionable metrics for parents and clinicians.
