Font Family: SF Pro Rounded

H1 (Brand/Title): 36pt | Bold | White

H2 (Data Value): 24pt | Semibold | FFC854

H3 (Subtitle): 18pt | Medium | White

Body (Data Label): 14pt | Regular | White

Caption (Bottom Nav): 11pt | Medium | Deep Grey/White

Status Visibility: Instantly communicates therapy progress to both the toddler and the parent without requiring complex data interpretation.

High-Contrast Data Cards: Built for accessibility and glanceability. Clear hierarchy allows caretakers to monitor vital metrics in high-stress environments.

Scalable Architecture: Modular tab structure designed for future tele-health integrations (e.g., direct chat with pediatricians)

UI Anatomy & Design Tokens

Engineered for a dual-user ecosystem, this scalable design system balances engaging gamification for toddlers with high-contrast data visualization for caretakers. Semantic tokens and accessible typography ensure visual consistency while streamlining the engineering handoff.
