LIGHT HOUSE

Set in Ningbo, **LIGHT-HOUSE: Sailor Club & Cultural Centre** bridges the gap between isolated seafarers and the public. Driven by narrative and storytelling, the Memory Centre simulates harsh maritime cabins using salvaged ship hulls to foster deep empathy. Its spatial dynamics and flow mimic a river delta, where pathways fork to create natural gathering points. To enhance emotional resonance, the design contrasts grounded local red brick with dynamic areas like trampolines , turning observation into active communication and relieving anxiety.
